Determining and planning your preventive actions

After you've inventoried and assessed your risks, it is quite often necessary to implement preventive responses. Seirich was designed as a genuine decision-making support tool to assist you with prioritising and planning such actions.

ANALYSING YOUR RISK ASSESSMENT IN RELATION TO TASKS

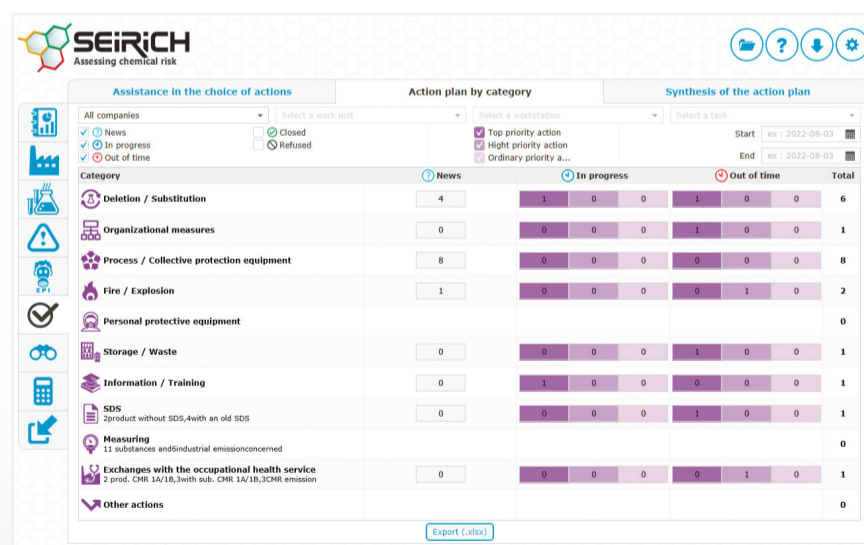

- ▶ View a summary of your risk assessment (levels 2 and 3 in the software)
- ▶ Analyse your tasks as part of an integrated approach
- ▶ Create actions classified into **11 specific categories** established based on the general principles of prevention

PLANNING AND FOLLOWING THROUGH ON THE ACTION PLAN

What makes Seirich a genuine prevention management tool:

- ▶ Defining action models
- ▶ Creating an implementation schedule
- ▶ Ensuring follow-up and integrating accomplishments and results
- ▶ Exporting and using the action plan

Elimination / Substitution

Organisational measures

Processes / collective protective equipment

Fire / explosion

Personal protective equipment

Storage / Waste

Information / Training

Safety data sheets (FDS)

Measurement

Exchanges with occupational health services

Other actions

IN SUMMARY Seirich, a comprehensive assessment and prevention tool for:

- ▶ Protecting employees' health
- ▶ Making activities safe
- ▶ Complying with legal requirements
